About These Charts

These charts list the percentage of students in a given class who scored "proficient" or better on the Smarter Balanced Assessment tests administered last spring. Where a score is represented by an asterisk, the state did not release data because too few students were enrolled in the class to calculate a meaningful result. The Vermont and New Hampshire departments of education keep detailed test results on their websites going back several years for every public school.

*Too few students had taken the test to release the scores.
